

Morning Journal.

BY THE ALBUQUERQUE PUBLISHING CO.
Wednesday, October 4, 1882.

Five old posters drawn from the wood; wines and liquors for family and medicinal use; champagne and cigars at W. E. Talbot's, the only reliable wholesale house in New Mexico.

NUDS OF NEWS.

Court business will commence in earnest to-day.

Election takes place here five weeks from yesterday.

A new advertisement of the Girard House appears in this issue.

The Bourgongnon block on Front street is nearing completion.

All bills against the Fair association will be settled next week.

Old town will present a lively appearance while court is in session.

The meeting in the Board of Trade rooms last night was well attended.

A large number of residences are in process of erection now than ever before.

Frank Manzanares has not yet accepted the nomination of the Democratic party.

Whitson & Nichols are making preparations to remove to their new quarters on Gold avenue.

The JOURNAL has a large list of subscribers at Lake Valley, which is being increased daily.

Quite a number of Albuquerque business men propose to establish branches at Lake Valley.

W. N. Smith has become something of a physician. He administers electricity instead of pills.

Rich strikes in the Lake Valley district are being daily reported and the camp continues to boom.

The Atlantic & Pacific extension of the street railway is doing a better business than heretofore.

Mayhew & Schaeffer, the jewelers, are moving into the new Harrison building, on Second street.

The grand jury yesterday afternoon returned an indictment against E. L. Lapham, ex-postmaster at Socorro.

The variety performances given at the opera house now are not as good as those rendered before the fair.

Archibald Hilson captured a drunk and disorderly individual yesterday afternoon, and deposited him in the bastille.

The bridge spanning the river at this point is rapidly nearing completion. It will be open for travel in a few days.

Benefactors appear to be the order of things at the Opera House. The Spriggs children are to be honored with one Thursday night.

The Cerrillos smelter has started up and is actively engaged in turning out bullion. The managers expect a long and profitable run.

Officer Murphy's pick pockets were discharged yesterday by Alcalde Martin de la Cruz, falling to put in an appearance.

The Republican county convention has not yet been called although several states have been made up. Some of them will be broken.

The city is filling up with lawyers and others from various parts of the Territory, who are here for the purpose of attending court.

Only one county commissioner "met" at Bernalillo Monday, and of course no business was transacted. Another meeting is called for to-day.

W. E. Talbot has sent out invitations to his friends to attend the opening of his new club house, the Montezuma, Saturday night.

R. H. Greenleaf has purchased the lot adjoining his residence on Silver avenue for \$1,000. This gives him a frontage of seventy-five feet.

Already quite a number of gas pipes have been set out in different parts of the city. They are good things, and there should be more of them.

The Socorro Miner will be run as a daily newspaper in a short time. The present size of the paper will be continued. Socorro must be experiencing a new boom.

There was quite a breeze kicked up on Railroad avenue early last evening, caused by Con Coddigan searching an intoxicated individual with the intention of taking away his gun.

There will probably be a slim attendance at the meeting of the Press association in Las Vegas Friday, as the officers failed to provide transportation for those who desire to go.

The Board of Trade saloon is to be moved to the old Free and Easy stand on Railroad avenue. The old room on Front street will be opened as an oyster restaurant by R. H. Greenleaf.

Milton Nobles has written to parties in this city, asking if he can secure the opera house during a part of December. Nobles thinks Albuquerque the best and liveliest town in the southwest.

The indications now are that the Hubbs smelter will be here long before the time originally intended. It is now about all torn down and being loaded on the cars at Cerrillos. The smelter will be a valuable addition to the industries of the city.

An unusually large number of drunken men were sleeping around in the streets and alleys last night. One could be seen at every turn; something should be done with these fellows, as they are of no use to the town or themselves and they are certainly not ornamental.

It seems as though it were time that somebody took interest enough in the appearance of the largest buildings in this city to have the streets surrounding them graded and leveled. At the corner of Gold avenue and Second street, the road bed is certainly from two to three feet below the grade. This should not be allowed to remain as it is for a thousand and one reasons that must be manifest to every person that has occasion to pass that corner.

GIANT POWDER.

The Mining Men of Bernalillo County and Their Prospects of Wealth.

The Work Now Going on and What the Results of the Labor Will be.

Albuquerque, as the Center of a Vast Extent of Mining Country Producing all Kinds of Mineral.

There are many people in this city, who are ignorant of the fact that hundreds of men are employed right around them, here in Bernalillo county, opening the inner recesses of the mountains in search of mineral. There are perhaps as many men engaged in mining, within a radius of fifty miles around Albuquerque, as can be found in the same space, anywhere in this Territory. The number of prominent business men in this city, engaged to a greater or less extent in mining, would be a surprise to most of the citizens here. There are no less than fifteen mining districts, whose territory is either partially or wholly within the county of Bernalillo. In the Sandia mountains, the first camp to attract attention is that of the Soda Spring Mining Company, whose property is situated in Cayate Canon. They have a number of very prominent leads, on the most important of which they are down 100 feet, and are now engaged in running a cross-cut. The ore found is free-milling, and the average assays are sufficient to cause the owners, Messrs. Stover, Cray, Hawley and Speer, no uneasiness as to the future. Col. Speer is in charge of the work and will push matters until he finds what there is in the mine. Hell or Hades is the next place where any considerable amount of work has been or is being done. The Star mine, so well known to all mining men in this locality, is the "boss" of this district, an immense amount of work has been already done on this mine with very satisfactory results. Dr. W. T. Strachan who, with Messrs. McKinney and Thomas, are the owners of this valuable find, says that they have found not only free milling ore in better than paying quantities, but that they have struck a sort of pulverized rock, which can be washed with ease and which will assay as high as \$50 per ton. Mr. Harsh owns a very good property in this district and is at work on it. He Stevens, another prospector, can show the visitor specimens from his property, that will make them wish to be partners with him. The Consolidated M. Zanita is the property of Stover, Cray and others.

The Golden Chariot, a very fine lead, belongs to Strachan, Lewis and Kuhn. There is a rich silver district just north of these properties, and it is such a one as will attract attention the very moment a little labor and capital is expended upon it.

Tijeras Canon is the next to attract attention, and it is certainly large enough to contain any quantity of mineral. The truth is that this canon has suffered, like many other parts of New Mexico, in being simply run over instead of having any systematic prospecting done. Mr. Carpenter and a few others have opened up some excellent leads, but, for some reason, have failed to follow them. Beside mineral bearing rock, coal in large quantities has been found, to be sure, the overlying rock is of shale, but this only serves to prove that the formation underneath is valuable.

Bear Canon is about twelve or fifteen miles north of Tijeras, and or all the canons it is the one most visited by the people of this city. Hardly a Sunday has passed during the last summer, but that from ten to twenty people, have drank at the little stream of clear mountain water, that comes bubbling out of what seems to be the casual visitor, solid rock. The mining in the Camp Whitcomb district, for by that name Bear Canon is known to the miners, has been done almost entirely without the aid of capital. Bryson, Sullivan, Whitcomb and Dunham are the men to whom the development of this district is due, and it is but fair to say, that these men, who have toiled and worked day after day with the drill and powder, are the loudest in singing the praises of a now almost deserted district. The mines, showing up the best in their present state of development, are the Cold Spring, Change-of-Luck, Bunker Hill and Jasper.

Continuing north the only other district is that directly east of Bernalillo, where Nathan Bibb, of that place, has expended a large sum of money in the development of numerous claims, some of which are showing rich ledges of pay mineral. Leaving the Sandia range and taking a northeasterly direction, the next district of any importance is that of Placita. Arrangements have been made by Mr. Cameron and others, of Bernalillo, to commence placer washing, while Prof. Bibb, of Albuquerque, has staked out a number of promising lode claims. Nearly north from Bernalillo, and about sixty miles away, reached however by one of the best roads in the Territory, is Copper City. So much has been said of this camp in The Journal, that it is hardly necessary now to give it an extended notice. The Eureka company, of which Captain William Borchert is president and Capt. Crowther, superintendent, has expended a large sum of money in developing and otherwise improving the property. The Eureka mine has an immense vein of easy smelting mineral, and working it will pay from the start. The Copper City company composed of several live business and professional men of

Albuquerque, has any number of valuable claims. Col. Crosson, Chas. P. Boston and Benjamin Chapman, have staked out and opened mines of copper ore that will pay their owners a large sum. The Bonanza King Company, consisting of Wm. H. Whiteman, E. B. Moore, Jas. Carlin and Patrick Carroll have as rich claims as can be found anywhere in the west. The town of Copper City is a thriving go-ahead place, and the business done there amounts to a considerable sum each month. There are many other districts in close proximity to Albuquerque, such as the New Placers, Old Placers and San Pedro, but the aim of this article has been to keep within the county proper. The Hubbs smelter, now being removed to this city, will cause such an awakening in mineral circles here in our midst, as will prove to outside capitalists that their money and time can be safely invested within a few miles of the largest city, in fact the metropolis, of the southwest.

RAILROAD REVIEW.

Over one hundred laborers went out on the Atlantic and Pacific road yesterday morning to work at the front.

A small swindling scheme has been discovered in railroad circles in this city, which will result in the discharge of at least one employe, if not more. The offenders will probably not be turned over to justice.

A prominent business man of this city received a letter from the secretary of the State of Michigan, in answer to a letter of inquiry concerning the projected railroad from El Moro to this city. The secretary's letter stated that a company known as the New Mexico Central & Northern railroad company had been organized under the laws of the State of Michigan, and filed in the secretary of state's office on the second of last June. The capital stock of the company is placed at \$3,000,000, with five per cent of a portion thereof already paid into the treasury for the current expenses. This puts a new face on the matter, and is likely to inspire confidence in the reality of the scheme. The actions of Corbin during his stay in this city have tended to destroy the confidence of the business public in the enterprise; but as the backing is now known to be good the road may yet prove a reality. The people of Watrous appear to have faith in the road, and are making efforts to get it through that town. Corbin himself went to Watrous yesterday in answer to a telegram on business connected with the road, and the stranger of all was that he put up four dollars in advance for the use of the team and buggy. On account of the absence of the chief of the starting of the engineer's party was necessarily delayed until this morning. The provisions are all ready to be loaded. —Las Vegas Gazette.

There was a large list of passengers on the Pacific express last night.

Most of the men on the Atlantic & Pacific road have completed their contracts, there being enough ties made to complete the road to the Colorado river.

It is forty-four miles from Beale Springs to the Needles. The grading on this piece of road will be done by Shenfield, Simms, Grant & McDonald, and others. A great many men and teams are now at work.

Two fast freight runs have lately been made from San Francisco east. Two trains, loaded with tea and silk, went through from Kansas City via the Southern Pacific and Atchafalaya, Topeka & Santa Fe in six days and six hours, and two trains covered the distance from San Francisco to Chicago via the Central Pacific, Union Pacific and Chicago, Burlington & Quincy in six days and a fraction.

In railroad building and railroad business was unprecedented in the south-western states. About 1,500 miles of road were put in operation, which is nearly 1,000 more than were built during the preceding year. The gross earnings of southern railroads last year reached \$63,000,000. In 1880 they amounted to \$43,000,000. The net earnings increased from \$14,000,000 in 1879 to \$18,000,000 in 1880, and more than \$24,000,000 in 1881.

The District Court.

Court convened, pursuant to adjournment, at 10 o'clock yesterday morning. Judge Bell, after going over the docket, decided to adjourn the court to meet again this morning at 10 o'clock. The grand jury found a bill of indictment against D. M. McFarland, the charge being assault and battery with intent to kill. The important case of Whitney vs. McAffact, in which the title to a grant is involved, is set for trial on Thursday morning. This case will consume considerable time, as several very nice questions touching the law of ejectments will have to be gone over. Messrs. Fiske & Warren, of Santa Fe, are for the plaintiffs, and C. C. McComas, of this city, for the defendant.

New Scholars at the Indian School. Yesterday five more children arrived at the Indian school. They are from the pueblo of Pajonque, which is about forty miles above Santa Fe. The children were brought to this city by one of the governors, who, by the way, is afflicted with a very peculiar eye trouble, which he came here to have treated. This will swell the number of children at the school to fifty-nine, a much larger number than has ever attended the school before. Mr. Bryan should feel proud of the appreciation, in which his school is held among the Indians. One chief, in answer to a question as to how long he intended to allow his children to remain, replied that one of them had been at the school for four years, and he thought he should let him stay three years longer.

PERSONAL PENCILINGS.

The People Who Come To and Go From the Central City.

Louis Neustadt is sojourning at the springs.

M. Heis, the Las Vegas liquor dealer, is in town again.

T. W. McIlvane, came down from Wallace last night.

J. M. Breeden, of Santa Fe, arrived in the city last night.

Judge J. R. Armijo, of Bernalillo, was in the city yesterday.

R. M. Dresser, of Las Vegas, is a guest at the Lilwall House.

Wm. M. Robinson, of Wooster, Ohio, is in the city for a few days.

Jos. Walsh, Pueblo, Col., is looking around the metropolis to-day.

O. P. Warner, of Detroit, Mich., came in from the north last night.

H. Wedeles, the Santa Fe grocery man, came in on last night's train.

M. H. Keegan, of Wallace, dropped down to the central city last night.

F. S. Pryor, auditor of the Atchafalaya, Topeka & Santa Fe road, is in the city.

J. H. Mathews of Canton, Ohio, was among last night's arrivals from the east.

Samuel Braunhart, a California politician, arrived in the city yesterday morning.

Elton Moore, the well known hotel man of Las Vegas, arrived in the city last night.

H. C. Lang, formerly with W. F. Crane, has taken a position with Scott & Borchert.

P. A. Simpson, of the Socorro Miner, paid the Journal office a pleasant visit last evening.

Armijo Sullivan & Henry have secured offices in the Monroe block, on Third street.

William Lysett, a Wallace saloonist came down with the other Wallace fellows last night.

Mrs. Dave Lesser has returned to the city after an extended visit to her old home in Nevada.

George H. Moore, of Wallace, and a worthy member of the family of hotel men, is in town again.

Judge Henry L. Warren and his partner Eugene Fiske, are in the city attending the district court.

T. M. Circle, of Rico, Colorado, arrived in the city last night, and is now a guest at the Armijo House.

Hon. Fernando Nolan, of Watrous is in the city again. He came down on last night's Pacific express.

George Rayfield, proprietor of the Grand Central Hotel at Socorro, came up from there yesterday morning.

John R. Price has returned from his fishing and hunting excursion to Jemez Springs. He talks fishy and relates numerous bear stories of interest.

OUR ABOMINABLE MAIL SERVICE.

Southern New Mexico is cursed with the most abominable mail service probably in the United States.

While it is pretended to give us a daily mail, and while those handling the mails get pay as though they deliver a daily mail, we receive about an irregular tri-weekly mail.

Now we know the mail did not arrive properly Sunday morning, the editor of the News left Albuquerque Sunday after eight p. m., we came through without delay, but no regular New Mexico daily papers came by that mail, not even The Daily Albuquerque JOURNAL, that we had read there twelve hours before starting, and not our other eastern dailies, but we got two delayed New York dailies. Tuesday we still failed to get our eastern mail, not even getting Socorro, Albuquerque, Las Vegas or Santa Fe papers of Sunday.

Wednesday we received regular and back mails. As a sample some regular New York papers from the same printing office that mail. Thursday, lo! and behold! no regular paper mail not even as far north as Socorro, while letters from different places in New Mexico and the east arrived all right. There has been no delay of trains, passengers coming through all right.

Where is Con Coddigan and his street cleaning brigade that did such noble service three weeks ago?

To our Patrons and the Public in General.

We intend to raffle off the two elegant white and black grain silk dresses, valued at \$250 each, which took the first premium at the last exposition. To all our patrons who trade with us to the amount of \$20 at one time we will present a ticket in this valuable raffle.

Prices of tickets are as follows: Tickets also for sale at our Palace Store, price \$2; 100 tickets will only be issued for each dress. All our goods will be sold at prices to defy any and every competition.

Respectfully,
STEVENS BROS.
Albuquerque, corner of First street and Gold avenue.

The Cyclone Grocery House.

We have for sale
20 cases fresh eggs.
30 tubs fresh butter.
100 barrels apples.
40 barrels sweet potatoes.
1 car of flour.
1 car of potatoes.

Country orders solicited. Quotations furnished on application.
BELL & COMPANY.

Why You Should

Buy groceries of Bell & Company. Their goods are new.

They make a specialty of groceries. They can and will.

And do sell more goods for the money than any house in the city carrying a mixed stock.

"You would not go to a blacksmith for a watch."

Buy your groceries of a grocer.
BELL & COMPANY,
The Cyclone Grocers.

Exposition Goods.

Among the finest products of the exposition, manufactured in the main building, is a beautiful black silk dress, made by the famous California dressmaker, Alexander. The dress is now on exhibition and for sale at 11-Field & Co's Bazar. This dress will be raffled as soon as the chances are all taken. Twenty-five chances, at \$4 a chance.

LOCAL NOTICES.

At The Alameda Fine Furnished Rooms

By the day By the week By the night By the month

Second street, near Railroad avenue. Everybody buys groceries at Bell & Co's, the Cyclone grocers.
